AMTEK RESEARCH PRODUCTS FOR OIL REFINERIES & TERMINALS

Oil Refineries and Fuel Distribution Terminals face the problem of receiving various Fuels processed from various types of Crudes at different times. Storage and Distribution of such Fuels results in blending of Fuels with different characteristics. Thus it becomes necessary to add Additives to bring them to a common performance standard. To assist such Terminals, AMTEK RESEARCH offers a range of commonly used broad range Fuel Additives.

AMTEK shall be pleased to advise Terminal Managers in selecting suitable Products for their Fuel to make them superior performing Fuels.

Commonly Used Terminal Fuel Additives:

1. Terminal Fuel Oil Additive for improving combustion characteristics to reduce carbon emission
2. Sludge Dispersant for Large Storage Tanks
3. Multifunctional Gasoline Additive
4. Multifunctional Diesel Additive
5. Gasoline Octane Improver
6. Diesel Lubricity Improver
7. AntiOxidant
