

Nawaz Modi Singhania's
solo art exhibition
will be open for
public viewing from
April 6 to May 4

CELEBRITY SPOTTING!

Nawaz Modi Singhania will showcase her portraits of iconic globally renowned personalities from various walks of life at the Raymond Flagship Store, Warden Road, Mumbai, between April 6 to May 4, 11 a.m. to 8 p.m.

The portraits on canvas (charcoal, oil and acrylic) are a tribute to iconic celebrities ranging from Hollywood stars like Brad Pitt, Angelina Jolie and Tom Cruise, to singers like Elvis Presley and Michael Jackson, to sports stars like David Beckham, Maradona, Roger Federer, to royalty (Princess Diana), scientists (Albert Einstein), corporate executives (Steve Jobs) and celebrity anchors (Oprah Winfrey) amongst others.

"Through the years, they've made us laugh and cry. They have inspired and motivated us, imbedded thoughts, imbibed emotions and character in us, enthralled and mesmerized us, both consciously and sub-

consciously. This collection is a portrait study of those who we love to love – or even love to hate," says Nawaz.

Nawaz is making a name for herself on the Indian art circuit for her visually impactful and unique renditions. On her creative journey, she has successfully held four solo exhibitions – three in Mumbai and one in New Delhi.

Trained and certified in America as a fitness professional by the American Council on Exercise and International Dance Exercise Association, Nawaz founded Body Art in Mumbai upon her return.

Soon after, she discovered a passion for painting. Ever since, she had been pursuing it with quiet enthusiasm and debuted with an exhibition in 2008. While art is a means of self expression for some or a platform to communicate a message for others, Nawaz finds art to be wonderfully therapeutic.

Her forthcoming solo exhibition is a portrait study of iconic globally renowned personalities. Nawaz avers that an artiste has to change, grow and evolve.

While appreciating art from across the world, Nawaz ardently believes that Indian art will take bigger leaps and bounds in the years to come and will leave a remarkable impact on international markets.
