Delivering Solutions in
Healthcare Education &
Emergency Response

Industry Scenario

- Allied healthcare professionals are untapped treasures and are critical to fixing the grey areas in India's healthcare workforce. There is a shortage of 7 million allied healthcare professionals in India and this increases the requirement for creating new jobs for the younger population of India.
 - Currently, India requires trained EMS & allied healthcare professionals in order to meet the needs of the hypersonic healthcare industry. Allied healthcare professionals have their own unique importance and are the right hands of doctors and nurses in hospitals, trauma centers or in any other kind of healthcare delivery points.
 - Lack of an efficient training infrastructure means public and private sector professionals do not possess the adequate skills in order to effectively deal with medical emergencies.
(Source: National Health System Resource Centre)
 - Dearth of ambulances and poorly trained manpower means higher mortality rates in the first 60 minutes of an accident. Therefore, the country's ambulance network must ensure an average primary crash response time of 8-10 minutes
(Source: National Trauma Centre Plan)
 - To sum up, training in first aid must be mandatory for all drivers, police personnel, conductors, teachers, students, etc. in order to save lives of fellow individuals and lower the mortality rate.
(Source: National Health System Resource Centre)

Who We Are

VIVO Healthcare is a leading healthcare education and training organization that offers the following services:

- Vocational Training
- First Aid & Life Support Training
- Ambulance & Equipment
- CSR Implementation

VIVO aims to create a pool of skilled healthcare workers who will fill the need for trained manpower in the healthcare industry while guaranteeing themselves a rewarding and fulfilling career. The company's vocational training programs are designed for entry-level job seekers and existing healthcare professionals.

VIVO also offers first aid and life support training programs for a wide range of organizations and also provides ambulance services and emergency medical equipment. The company has trained over 1,30,000 participants in schools, corporates, healthcare, and government organizations.

Our Affiliation & Accreditation Partners

The Healthcare Sector Skill Council (HSSC) is a unique initiative of the government's National Skill Development Corporation (NSDC). The HSSC plays a proactive role in creating a vibrant ecosystem for quality education and skill development within the allied healthcare space.

The National Skill Development Corporation (NSDC), working under the aegis of the Ministry of Skill Development and Entrepreneurship, is an important organisation overseeing skill development in the country. The NSDC is responsible for overseeing the various Sector Skill Councils. It is also responsible for other skill development and promotional activities across the country, including implementation of important government skill schemes such as PMKVY and UDAAN.

American Heart Association (AHA) is recognized by the global medical community as the thought leader in emergency medical training related to cardiovascular diseases and stroke.

American Safety & Health Institute (ASHI) is a leading provider of basic and advanced emergency care and resuscitation training programs. ASHI training programs have been used to teach and certify emergency care providers in health care, business, industry, and the general public since 1996.

VIVO Healthcare Pvt. Ltd. is an ISO 9001:2015 certified organization

Vocational Training

Emergency Medical Technician-Basic (EMT-B)

An Emergency Medical Technician is trained to provide basic emergency medical care to patients in emergency situations. They are skilled in all levels of Basic Life Support (BLS) procedures. On successful completion of the course, these students can work in hospitals, trauma centres, ambulances and a range of other healthcare institutions.

Duration: 6 / 2 Months (710 / 360 Hours)

Eligibility: 10+2 / Healthcare background including Nursing (GNM), BAMS, BHMS, B.Sc. (Life Sciences)

Theory+Simulation: 350 Hours / 240 Hours

Internship: 360 Hours / 120 Hours

Certification: VIVO Healthcare / HSSC

Advanced Emergency Medical Technician- (EMT-A)

This course is designed to educate and train healthcare professionals in advanced aspects of emergency and pre-hospital care. On successful completion of the course, these students can work in air ambulances, hospitals, trauma centres and a range of other healthcare institutions..

Duration: 6 Months (1000 Hours)

Eligibility: 10+2 with Science / EMT-Basic

Theory+Simulation: 750 Hours

Internship: 250 Hours

Certification: VIVO Healthcare / HSSC

Dialysis Technician (DT)

A Dialysis Technician is a trained technician that maintains and operates the equipment used for dialysis, a process that cleanses the blood of metabolic waste products. There is a huge demand for well-trained dialysis technicians with expertise in not only handling machines but also in medical emergencies that may arise unexpectedly during dialysis.

Duration: 12 Months (1600 Hours)

Eligibility: 10+2

Theory+Simulation: 800 Hours

Internship: 800 Hours

Certification: VIVO Healthcare / HSSC

Radiology Technician

Radiology Technicians are trained to operate advanced radiographic equipment such as CT Scan, MRI and X-Ray machines. These images are used by doctors and specialists to aid in diagnosis of illnesses and injuries. On successful completion of the course, students can work and build a successful career in diagnostic centers, hospitals, educational institutes etc.

Duration: 12 Months (1800 Hours)

Eligibility: 10+2 with Science & X-Ray Technician with 3 yrs Exp.

Theory+Simulation: 900 hours

Internship: 900 hours

Certification: VIVO Healthcare

X-Ray Technician

X-Ray Technicians form a vital part of any healthcare team. They are responsible for operating X-Ray machines and managing patients during X-Ray procedures. These X-Ray technicians are provided with the most sophisticated level of training wherein they can easily comply with safety regulations involved in the use of X-Ray equipment while on the job.

Duration: 8 Months (1200 Hours)

Eligibility: 10+2

Theory+Simulation: 600 hours

Internship: 600 hours

Certification: VIVO Healthcare

Dental Assistant (DA)

Dental Assistants assist the dentist in the integral delivery of quality oral health care and are important members of any dental care team. A Dental Assistant is involved in a number of activities for providing assistance to the dentist before, during or after a procedure. After the successful completion of the course, these students can work as Dental Assistants in dental clinics, health clinics, and healthcare institutes.

Duration: 6 Months (700 Hours)

Eligibility: 10th Pass outs

Theory+Simulation: 510 Hours

Internship: 190 Hours

Certification: VIVO Healthcare

Phlebotomy Technician

The job of a Phlebotomy Technician is to obtain blood and various other clinical specimens from the patients. Post training and successful completion of the course, these students can work in hospitals, blood banks, physician offices or in independent labs.

Duration: 4 Months (600 Hours)

Eligibility: 10+2

Theory+Simulation: 360 Hours

Internship: 240Hours

Certification: VIVO Healthcare / HSSC

General Duty Assistant (GDAs)

General Duty Assistants (GDAs) support the nursing staff of a hospital or any other healthcare provider. Their job is to maintain hygiene levels to a certain standard and assist the nurse/doctor in delivering their duties. Post successful completion of the course, these students can work in nursing homes, home healthcare and hospitals.

Duration: 2 Months (420 Hours)

Eligibility: 10th Pass outs

Theory+Simulation: 240 Hours

Internship: 180 Hours

Certification: VIVO Healthcare / HSSC

Cardiac Care Technician

Cardiac Care Technicians are trained to assist cardiologists in all invasive and non-invasive procedures (angiogram, angioplasty, pacemaker implant, stress echo, tilt table test, and holter monitoring). These certified Cardiac Care Technicians can work in hospitals, diagnostic centers, medical equipment manufacturing companies, healthcare institutes, etc.

Duration: 12 Months (1500 Hours)

Eligibility: 10+2 with Science or ECG Technician

Theory+Simulation: 840 Hours

Internship: 660 Hours

Certification: VIVO Healthcare

Diabetes Educator

Diabetes Educators are trained to educate and support individuals suffering from diabetes. They have a comprehensive understanding of prediabetes, diabetes prevention, and management. These Diabetes Educators make a promising career path in hospitals, diabetes clinics, healthcare institutes, nursing homes, NGO's etc.

Duration: 2 Months (360 Hours)

Eligibility: 10+2

Theory+Simulation: 240 Hours

Internship: 160 Hours

Certification: VIVO Healthcare

Medical Laboratory Technician

Medical Laboratory Technicians are important members of any clinical laboratory team. Medical Laboratory Technicians analyze fluid, tissues and blood samples to perform a variety of diagnoses. They generally work under the supervision of a pathologist. On successful completion of the course, students can work in hospitals, diagnostic labs, blood banks and medical clinics.

Duration: 12 Months (2000 Hours)

Eligibility: 10+2 in science or Level 3 Phlebotomy with experience in laboratory setup.

Theory+Simulation: 1200 hours

Internship: 800 hours

Certification: VIVO Healthcare

Operation Theatre Technician

This certificate prepares the student to be fully conversant with the functioning of the operation theatre and surgical procedures undertaken in the OT. They are trained to maintain the OT equipment and instruments, check the infection control practices and status of sterilization of the OT and also ensure its smooth functioning. A trained OT technician is the most important element of the surgical team.

Duration: 12 Months (1600 Hours)

Eligibility: 10+2 with Science

Theory+Simulation: 240 Hours

Internship: 180 Hours

Certification: VIVO Healthcare

Home Health Aide

Home Health Aides are trained to provide healthcare to the convalescents, elderly or the people with disabilities by visiting their homes. They are trained to monitor as well as report changes taking place in the health status of these patients. In addition, they are also responsible for providing personal care such as dressing, grooming, and bathing to these patients.

Duration: 1.5 Months (360 Hours)

Eligibility: 10th Pass outs

Theory+Simulation: 240 Hours

Internship: 120 Hours

Certification: VIVO Healthcare

Vision Technician

Vision Technicians, also known as eye technician, aid in the accurate delivery of vision care. They are trained to undertake clinical as well as administrative duties. Clinical duties include recording and taking medical histories and vital signs and preparing individuals for an eye examination while administrative duties include scheduling appointments and maintenance of medical records.

Duration: 2.5 Months (425 Hours)

Eligibility: 10+2 with science, 10th pass outs can be considered in certain cases

Theory+Simulation: 225 Hours

Internship: 200 Hours

Certification: VIVO Healthcare

An Overview

These programs meet the emergency needs of students in schools and teach them to handle situations such as allergic reactions, diabetes, asthma, fainting, nose bleeding, burns, truancy, food poisoning, sexual harassment, disasters, etc.

Training Methodology: More practical, less theoretical

- Lectures & Demonstrations on CPR Mannequins
- Applying Dressings, Bandages & Splinting
- Video Presentations
- Discussions & Interactions

CSR Implementation

Skill Development: Meeting the need for quality healthcare workers

- Improve the quality and accessibility of healthcare delivery by providing skilled workers
- Create First Responders* in schools, corporates, and communities
- Develop paramedics & other allied healthcare professionals and in the process creating employability for unemployed youth
- Train doctors and nurses with specific skills required for pre-hospital and emergency care situations.

* First Responder: A person who is trained to provide medical support in an emergency before more highly trained medical personnel arrive on the scene

Developing Healthcare Infrastructure: Improving ability to respond to medical emergencies

- Increase the availability of well-equipped ambulances, staffed with trained paramedics
